History: This message has been forwarded.

LaDonna:

Per our telephone conversation of this date, the Pueblo does not have any problems in the meeting going forward on December 7, 2010, which will be a meeting with our staff people from the Environmental Office, Reclamation Office, and/or Natural Resources, and with EPA staff and well as other possible federal agency staff who may possess historical knowledge of the Jackpile Mine. If you need anything else, please do not hesitate to contact our office.

Frank

Hello Frank.

I wanted to follow-up with you on the email and attachment below. We haven't heard from the Governor about the proposed meeting date or the participation of other federal agencies with historical knowledge of Jackpile Uranium Mine in the planning meeting. I have heard from Barbara Bernacik with the Laguna Environmental Department and she stated that December 7 would be a good meeting date for her office. Please let me know if the Governor would like for us to proceed with this meeting and participants.

Please let me know if you have any questions.

Thank you.

LaDonna Turner

Subject: EPA additional work at Jackpile mine

Gov. Antonio,

653648

The attached letter is in response to your request to provide a written request for participation of other federal agencies in our planning process for additional investigations at the Jackpile mine. As described in the letter, we are specifically requesting the participation of DOI (i.e. USGS, BIA, and BLM) at a planning meeting to be held at the mine on December 7th or 8th. EPA feels that leveraging the historical knowledge of DOI along with your environmental staff is key to planning the next steps at the mine.

Please let me know at your earliest convenience if this proposal is acceptable. A hard copy of the letter will also be sent.

John C. Meyer
Chief, Risk and Site Assessment Section
